

# Visual Audit Analytics (VAA)

## Version 1.0.1 Release Notes

Release Date: 31 May 2026

This maintenance release includes bug fixes, usability improvements, and stability enhancements identified following the initial public release of Visual Audit Analytics.

## Bug Fixes

### Import Logging

- Fixed an issue where the activity log did not capture all details when importing Excel (.xlsx) files.
- Improved logging for Print Report imports to provide more complete import information.

### Table Filtering

- Fixed an issue where **IS NULL** and **IS NOT NULL** conditions were not available when building table filters.

### Recent Projects

- Fixed an issue where previously saved projects were not always displayed in the Recent Projects list.

### Flow Execution

- Fixed an issue where the **Right Click → Run** option on workflow tasks was not functioning correctly.

## Enhancements

### Filter Results Summary

- Added a summary showing the number of records matching the filter criteria.
- Example: *Filtered 320 / 400 rows.*

### Stability Improvements

- Improved internal settings management and application stability.
- Existing projects and user settings remain fully compatible.

## Compatibility

- No changes to project file formats.
- Existing projects remain fully compatible with this release.
- No action is required beyond installing the update.

## Feedback and Support

As always, we welcome feedback from early users as we continue improving the platform.

Areas of particular interest:

- Workflow usability
- Performance
- Import/export requirements
- Additional task requests
- Reporting enhancements
- Integration requests
- AI-assisted workflow ideas

Questions, feedback, and enhancement requests can be sent to [support@visualanalytics.ca](mailto:support@visualanalytics.ca)

## Thank You

Thank you for supporting Visual Audit Analytics and for the feedback received following the v1.0.0 launch.

Mike Pretorius  
Founder, Visual Audit Analytics
