

# Visual Audit Analytics (VAA)

## Version 1.0.2 Release Notes

Release Date: 5 June 2026

This maintenance release includes a correction to Print Report imports involving date field detection.

### Bug Fixes

#### Print Report Import

- Fixed an issue where date fields imported from Print Reports were incorrectly recognized as text fields.
- Date values are now automatically imported using the appropriate date data type, enabling date filtering, sorting, calculations, and analysis without requiring manual conversion.

### Recommended Upgrade

- All users are encouraged to upgrade to Version 1.0.2 to ensure date fields from Print Reports are imported correctly.

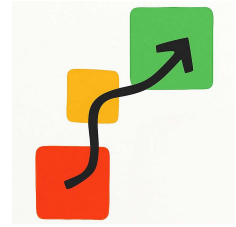

### Feedback and Support

As always, we welcome feedback from early users as we continue improving the platform.

Areas of particular interest:

- Workflow usability
- Performance
- Import/export requirements
- Additional task requests
- Reporting enhancements
- Integration requests
- AI-assisted workflow ideas

Questions, feedback, and enhancement requests can be sent to [support@visualanalytics.ca](mailto:support@visualanalytics.ca)

## Thank You

Thank you for supporting Visual Audit Analytics and for the valuable feedback received so far. Your suggestions are helping shape the future direction of the platform.
